

Résumé

Osman Gormus
osman@gorm.us
+1 (415) 827-2170

Introduction

I have been developing websites for a little over two decades. I have been fortunate to have worked on projects with clients in all sizes in various industries; including software, construction, education, healthcare, and financial.

Last 11 years, I worked as a senior developer at Project6 Design (<http://www.project6.com/>), in Emeryville, California.

I've built websites using static HTML, PHP Frameworks, ASP.Net MVCs, even Java Servlets at one point. There is an alphabet soup of technologies I have learned and used where they applied.

The majority of the websites that I built or contributed developing have used a Content Management System (CMS). While Drupal has been my all-time favorite, my experience extends to a range of frameworks and CMS including Laravel, Sitecore, Sitefinity, and Wordpress.

Below you will find some of my recent projects, contributions, accolades, and more:

Skills

Troubleshooting Problem solving Full-stack
Drupal Laravel
CMS (Content Management System) PHP MySQL
Continuous integration CSS Sass/SCSS LESS
HTML5 Bootstrap Foundation JavaScript
Node.js Gulp / Grunt Handlebars Apache
nginx LAMP (Linux, Apache, MySQL, PHP)
IIS (Internet Information Services) ASP.net/C#
MSSQL SEO (Search Engine Optimization)
XML Sitemap Web Accessibility

Projects

2017 Clackamas Community College

Helped setting up and configuring continuous delivery tools for multiple instances of Sitefinity servers.

Configured Sitefinity CMS for unique type of content-types and lists for easier content management and also for automating development.

Created MVC-based Sitefinity CMS widgets to easily add pre-formatted and styled content onto the pages using the UI tools.

Created a responsive theme based on the provided designs, style-guides, and the architecture; and integrated it with Sitefinity's Feather framework.

- [Case Study \(/work/Clackamas-Community-College/\)](#)
- [Clackamas Community College \(website\)](#)
(<https://www.clackamas.edu/>)

Sitefinity CMS ASP.NET MVC Feather framework Continuous delivery

2017 SAG-AFTRA Plans

Created a responsive theme based on the provided designs, style-guides, and the architecture.

Created separate landing pages and configured the site to create and serve multiple sub-sites

Created "CKEditor List Style" module for the content authors. Later contributed it Drupal community.

- [SAG-AFTRA Plans \(website\)](http://www.sagafttraplans.org/) (<http://www.sagafttraplans.org/>)
- [CKEditor List Style \(Drupal 8 module\)](https://www.drupal.org/project/ckeditor_liststyle) (https://www.drupal.org/project/ckeditor_liststyle)

Drupal 8

2017 CrossFit Games

Worked with a large team of content authors/editors and front-end developers.

Converted existing Drupal website into a content repository. Removed all the themes, modules and configuration related with the presentation layer. Optimized configuration. Simplified backend UI and hence the user-experience.

Created RESTful access endpoints for each content-types, taxonomies, views, etc. for the new front-end web.app

Worked back-and-forth with the front-end developers to make necessary changes and optimization in RESTful endpoints based on their implementation needs, feedback, and requests.

- [CrossFit Games](https://games.crossfit.com/) (<https://games.crossfit.com/>)

Drupal 7 RESTful Services API Performance Optimization

2016 Berkeley Arts+Design

Created the backed structure based on the designed architecture.

Worked tandem with a front-end themer, provided required markup via custome views, blocks and node templates for theming.

Built dynamic two-tone, two-line, indented headlines to accomodate unique graphics designed in-house.

Built main layout structure, and block placement logic for each section.

- [UC Berkeley Arts+Design \(website\)](http://artsdesign.berkeley.edu/)
(<http://artsdesign.berkeley.edu/>)

Drupal 8

2015 CoreBrands

Created a Drupal multi-site environment to host the main brand website and accompanying family brands.

Created a base theme to share with all the websites available in the same environment, and individual sub-themes for each one to override the base and define their own brand identity.

- [Core Brands \(website\)](http://www.corebrands.com/) (<http://www.corebrands.com/>)

(<http://www.elanhomesystems.com/>)
- [SpeakerCraft \(website\)](http://www.speakercraft.com/) (<http://www.speakercraft.com/>)
- [Gefen \(website\)](http://www.gefen.com/) (<http://www.gefen.com/>)
- [Furman \(website\)](http://www.furmanpower.com/) (<http://www.furmanpower.com/>)
- [Niles Audio \(website\)](http://www.nilesaudio.com/) (<http://www.nilesaudio.com/>)
- [Panamax \(website\)](http://www.panamax.com/) (<http://www.panamax.com/>)
- [Proficient \(website\)](http://www.proficientaudio.com/) (<http://www.proficientaudio.com/>)
- [Xantech \(website\)](http://www.xantech.com/) (<http://www.xantech.com/>)

Drupal 7 multi-site

2015 Stanford West Apartments

Created a responsive Drupal 7 website for Stanford Faculty Staff Housing.

Built a custom booking system for Clubhouse reservations.

Constructed the site for easier page management via Beans and Blocks.

Created custom maps with filters for listing neighborhood businesses.

Created views for floor-plans with image galleries.

- [Stanford West Apartments \(website\)](https://stanfordwest.stanford.edu)
(<https://stanfordwest.stanford.edu>)

Drupal 7 Custom maps Custom booking calendar/reservation system

2015 Lighting Services Inc.

Developed both backend and frontend of the website based on the (in-house) designed site architecture, style-guide and graphic designs.

Created advanced search pages with filters for the products, image galleries, representatives, lighting designers, and downloads sections.

- [Lighting Services Inc. \(website\)](http://www.lightingservicesinc.com/)
(<http://www.lightingservicesinc.com/>)

Drupal 7 Responsive Design

2014 Berkeley Physics

Developed both backend and frontend of the website based on the (in-house) designed site architecture, style-guide and graphic designs.

Created different layout templates and tools for content authors/editors to present their content, and links in multiple different ways.

- [Website \(http://physics.berkeley.edu/\)](http://physics.berkeley.edu/)

Drupal 7

2013 The Commonwealth Fund

Created templates as a working static responsive website to be ingrated into client's own CMS.

Used server-side includes to modularize each deliverable feature or section.

Shared browsable template site with client to get feedback during development.

Static website ZURB's Foundation Responsive Design Templates
Server-Side Includes

2013 The Gordon & Betty Moore Foundation

"The Gordon & Betty Moore Foundation believes in bold ideas that create enduring impact." —If you lead with that mission statement on your home page, everything that follows had better deliver. And when it comes to initiatives in environmental conservation, patient care, and science, both around the world and in the San Francisco Bay Area, the Moore Foundation delivers with passion. Early this year, the communications team approached Project6 Design with a challenge: match the energy and vision of their work with an inspiring, responsive website design. Read more:

Sitefinity Content Management System Responsive Design

2013 Biscoff

The redesigned Biscoff website offers a bolder, more premium online brand presence, richer interactivity, and more effective SEO than its predecessor.

Visitors now browse tantalizing images of recipes, enjoy discounts and promotions, and share locations where they first discovered delicious Biscoff cookies or spread — on their desktop, tablet, or mobile device.

2013 Vaughn Construction

Project6 Design, a San Francisco Bay Area graphic design firm, is excited to announce the launch of a dynamic, responsive website for Vaughn Construction.

Based in Houston, TX, Vaughn offers the rare combination of a traditional general contractor plus sophisticated construction management. Their process-driven and results-focused approach allows them to deliver the best quality at the best value.

Sitefinity Responsive Design

2013 AUL Corp.

Project6 Design launched the website for AUL - America's premier service contract administrator based in Napa Valley, CA.

AUL provides a wide range of vehicle service contract options. So you can cover as much as you need for as long as you need. A wide variety of choice is just one reason AUL is the number one service contract provider in America. Project6 redesigned the website and built it in the Sitefinity content management system.

2011 Publications for UCSF Profiles

Created a Drupal 6 module and its intended audience is primarily UCSF, University of California, San Francisco websites. It helps UCSF employees to import their scholarly publications from the UCSF Profiles repository (<http://profiles.ucsf.edu/>). ---- This module's intended audience is primarily UCSF, University of California, San Francisco websites. It helps UCSF employees to import their scholarly publications from the UCSF Profiles repository.

Bibliography or publications could be managed by the well known Biblio module. However, many websites only need to provide a listing of publications of the authors. The profiles service collected profile information, including the publications for UCSF faculty members, researchers with academic leadership appointments, and postdoctoral scholars. This module imports those publications provided by the profiles service into the Drupal.

- [Drupal module \(https://www.drupal.org/project/ucsf_profiles\)](https://www.drupal.org/project/ucsf_profiles)

Drupal 6 Drupal contributed module publications biblio UCSF

2011 Pankow

Pankow is a 200+ person construction services firm with four offices in locations in Northern and Southern California and Hawaii. Built their website with Sitefinity content management system, providing a .NET CMS solution that was easy for the Pankow IT staff to maintain. The CMS also allows the marketing team to login and quickly update any part of the website. Most importantly, the site reflects their true brand attributes: integrity, collaboration, and innovation. Applying the new designs to coding required quite a few custom and very elegant solutions, tight combination of server-side and client-side technologies. Project6 Design won two 2011 Silver W3 Awards and four 2011 Silver Davey Awards from the International Academy of the Visual Arts (IAVA) for excellence in its web design and build projects. Drupal Single instance, multi-site setup

Contributions

These are some of the software (modules, plugins, distributions, etc.) that I created and contributed to the community:

Lazy-load

Last publish: April 2018

Lazy-load is a filter module for text-formats to alter rendered output.

Integrates a lazy loading image script (bLazy) with content images and iframes.

Requires no changes to existing content to function.

Optionally it could be enabled for field images too, to provide a complete solution for "all" the images for lazy-loading.

A port for Drupal 8 is in development.

- [Drupal module \(https://www.drupal.org/project/lazy\)](https://www.drupal.org/project/lazy)

Drupal 7 modules 3rd-party integration bLazy

noSpamQuiz.js jQuery Plugin

Last publish: March 2018

The plugin automatically populates a quiz based on the questions author defined. This quiz temporarily replaces the comment form on the page, until the visitor answers all the questions correctly. Only then the quiz reveals the form, and hides itself.

Using this plugin creates a different way of engaging with the site visitors by requiring them to read the article before being able to comment on it. Questions are defined by the author based on the content itself.

The plugin offers options for customization and callback function.

Share This Thing

Last publish: November 2012

This is a simple Drupal module for enabling "Sharing" options for the selected content.

Integrates with AddThis service.

Supports URL Shortening services.

33 sites report using this module as of March 17, 2018. 1,841 downloads.

- [Drupal Module \(https://www.drupal.org/project/ckeditor_liststyle\)](https://www.drupal.org/project/ckeditor_liststyle)

Drupal 7 modules social sharing short URL AddThis
3rd-party integration

Publications for UCSF Profiles

Last publish: March 2012

This module's intended audience was primarily UCSF, University of California, San Francisco websites.

It helped UCSF employees to import their scholarly publications from the UCSF Profiles repository into their Drupal 6 websites.

Imports publication data as nodes, built on top of JSON API

Used by websites for Gladstone Institutes, Institute for Health Policy, Department of Emergency Medicine, etc.

1,055 downloads.

Honors & Awards

Most recent accomplishments:

Project6 Design was recognized for their excellence with a gold award for the Corporate & B2B ELAN Home Systems website.

2016 • Horizon Interactive Awards

Project6 created a customizable design system utilizing Drupal as the CMS. Using longer scrolling pages with a flexible modular system, the new website design allows ELAN staff to add or edit sections with ease. The new look and feel is elegant and modern, uncluttered and light. To correct the outdated dealer information, Project6 created a custom dealer locator to pull from the Core Brands database on an automated schedule. As well, a custom feed of products updates the website automatically, creating all product pages on the website and populating all content on those pages. The result is an up-to-date, mobile-friendly website that reflects the true character of the ELAN brand.
